Client Story: Louisiana Lafayette - Single Sign-On for Giving

Louisiana Lafayette needed to consolidate their giving process and ensure that mobile users would experience a simple and easy process for giving to the university. Leveraging the single sign-on integration between MobileUp and Custom Donations, Lafayette was able to create the user experience they were after - a simple, one-click giving with no personal information required.

"Integrating Custom Donations forms into our MobileUp app makes giving through the app seamless. We have already received positive feedback from app users about the process."

-Lauren Shiver, Associate Vice President of Operations at University of Louisiana at Lafayette

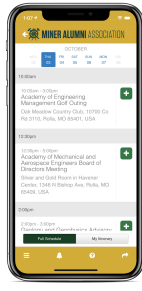

Client Story: Missouri Science & Technology - Homecoming goes mobile

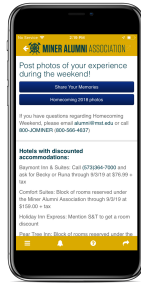

The University of Missouri Science and Technology has built out a complete Homecoming 2019 experience within their alumni app. If you have an interest in providing a custom homecoming experience for your alumni, contact support@mobileupsoftware.com, it is not too late!

Product Updates & Releases:

Groups 2.0:

The new Groups (Clubs, Chapters & Organizations) module has many new features to address client needs and provide a more robust area for group members and administrators to engage and conduct business.

If you already have clubs, chapters and organizations turned on today with the current module referred to as CCO, please contact support@mobileupsoftware.com to convert your existing groups over to the new Groups 2.0 module.

Geo-Activities:

The new Geo-Activities module provides the ability to assign any number of activities to a single geo-fence or beacon. Activities are attached to the geo-fence or beacon and 'start' and 'end' times are assigned to each activity for greater reporting analytics.

Single Sign-On:

MobileUp now offers both SAML and OAuth as authentication methods thus allowing Clients to use existing authentication for app users to login.

Sign-On (SSO) allows app users to access content and other applications without needing to login again or through multiple login screens. App users are presented a seamless app experience across various applications presented within the app.

Planning Ahead:

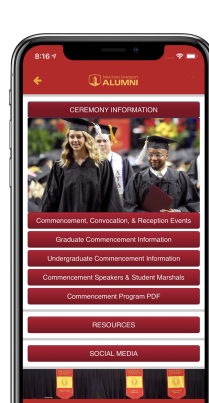

Commencement Re-done - Iowa State University

Iowa State University Alumni Association leveraging their existing mobile app, partnered with the registrar's office to create a comprehensive commencement event experience for graduates and guests within their app. The feature rich module included a complete schedule of events, general commencement information, speaker and graduate directories, photo 'hot spots', lodging and dining directories along with the complete commencement program. Bottom line...better experience and big cost savings!
